The Action covered the development of nine Safe and Secure Truck Parking Areas (SSTPAs) for truck drivers, certified at 'Silver' standard level, for a total of 182 truck parking places. The SSTPAs are located in five different sites along the TEN-T core network.

More specifically, the Action covered the following:

- Construction of 2 SSTPAs in Aerino, at km 306 of the E75 motorway, for a total capacity of 72 parking places
- Transformation of the existing service station in Akrata, at km 152 of the E65 motorway, into a SSTPA with a capacity of 45 parking places
- Construction of 2 SSTPAs in Atalanti, at km 144 of the E75 motorway, for a total capacity of 24 parking places
- Construction of 2 SSTPAs in Episkopiko, at km 194 of the E951 motorway, for a total capacity of 21 parking places
- Transformation of two existing service stations in Analipsi, at km 349 of the E90 motorway, into two SSTPAs with a total capacity of 20 parking places

Furthermore, an e-Service platform for truck-drivers was developed, providing all the necessary information about the location of SSTPAs, their certification level and available services as well as enabling pre-booking and pre-payment options for parking places.

However, the Action was only partially completed as the 2 SSTPAs in Analipsi were finally not constructed.
